	6.	1 to 4 October 1949
25X1		58 single-engine and 4 twin-engine
0EV4		aircraft were parked on the western edge of the field There
25X1		was no flying.
25X1		
	7.	A radio truck with a braced 33-foct mast on its side was seen
		north of the garage. The mast had a 7-foot cross rod an-
		tenna which was connected with the radio truck.
25X1		Comment:
2EV1		a. The report confirms that the field was reconditioned and occupied by fighter units.
25X1 25X1		Coodpied by Timiter units.
25X1		The fletc was affectly occupied by about
•		100 fighters in late August 1949 which is considered credible because of the observed railroad shipments and the observation
		that two lighter regiments had been t ransferred from DOFRERITG
		and one fighter regiment from STAAKEN. It is thought that the
		fighters observed on the western edge of the landing field do not represent the total occupation of the field where the
25X1		entire 294th Ftr Liv is assumed to be stationed.
25X1		
		corns the circled Contracted up to now exclusively con-
		acents' reports have been received on the reconstruction of
		the V-missiles test station.
